Good news stories

[Repairs on Oxenbridge Lane, Etchingam](#)

A vehicle collision had damaged the brickwork parapet, causing half of the wall to collapse and leaving a significant unprotected drop above the watercourse below. A hanging scaffold platform was used to safely access the bridge's elevation and rebuild the parapet like-for-like. Four reflective verge marker posts were also installed around the structure, to improve visibility of the bridge for highway users.

While on site, we took advantage of the road closure and identified several opportunities for betterment along Oxenbridge Lane. Vegetation clearance to the two other bridges along this road was carried out, a joint in one of the bridge parapets was repaired, a significant pothole was filled, the gullies were uncovered and cleared out, edge of carriageway erosion was repaired by installing concrete grips, and the litter in the verges was collected.

[New blog](#)

We've recently launched our new regular blog series, aimed at providing a more detailed look at popular topics within the county. Each post is publicised via our social media channels and can be found on our website under Latest News.

[Celebrating Apprentices and T Level Students at East Sussex Highways](#)

Across a range of disciplines, East Sussex Highways support Apprentices and T Level Students developing skills and building their futures.

From Electrical Streetlighting to Project Management, these roles develop key skills in data analysis, health and safety, and collaborative working.

Over the last few months, we've welcomed three Engineering T Level students from East Sussex College and Bexhill 6th Form College. During their industry placements, students have supported live projects, attended team meetings, completed mandatory training and taken part in the annual Stand Down safety briefing, gaining valuable insight into safety and wellbeing in the highways industry.
